DETAILED ACTION

1. This action is in response to applicant's amendment filed on September 16, 2004. **Claims 1-6,9-16,19-26 and 29-40** are now pending in the present application.

REASONS FOR ALLOWANCE

2. The following is an examiner's statement of reasons for allowance: the prior art of record fails to disclose or render obvious, alone or in combination, claims 1-6,9-16,19-26 and 29-40. The subject claims are directed to a method, apparatus and system for intelligent tandemming of an incoming call to an application node in telecommunication systems.

Specifically regarding claims 1,11 and 21, the prior art of record does not teach or suggest the feature of when a subscriber profile includes a tandem parameter, obtain a routing parameter, wherein the routing parameter is selected from a plurality of routing parameters, the plurality of routing parameter including a plurality of dialing classes, a plurality of rate centers, a plurality of routing classes, and a plurality of origination indicators and performing digit analysis of the called party directed number.

Specifically regarding claims 38,39 and 40, the prior art of record does not teach or suggest the feature of the tandem parameter is includes a s predesignated value of a field within an ANSI-compatible message of a plurality of ANSI-compatible message, the plurality of ANSI-compatible message including a registration notification result, a qualification request return result, a location request return result, and a qualification directive (invoke), to obtain a routing parameter and perform digit analysis of the called party directory number.

The previously applied prior art of record DePaola discloses of a system and method for tandemming incoming calls to an application node and using ANSI-compatible messages and
